PATENT COOPERATION TREATY

PCT

REC'D 0 3 OCT 2005

INTERNATIONAL PRELIMINARY REPORT ON PATENTA

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference TBS/87517WOP	FOR FURTHER AC	ACTION See Form PCT//PEA/416		
International application No. PCT/GB2004/002740	International filing date (c 24,06,2004	(ay/month/year)	Priority date (day/month/) 24.06.2003	year)
international Patent Classification (IPC) or A61G7/10, A61F15/00	ational classification and IPe	Q		
Applicant PIKE, Anthony Bruce				
This report is the international pr Authority under Article 35 and in	eliminary examination rep ensmitted to the applicant	oort, established by this according to Article 36	s International Prelimina: 3.	y Examining
2. This REPORT consists of a total of 5 sheets, including this cover sheet.				
3. This report is also accompanied by ANNEXES, comprising:				
a. 🖾 sent to the applicant and to the international Bureau) a total of 1 sheets, as follows:				
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).				
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.				
b. (sent to the International Bureau only) a total of (Indicate type and number of electronic carrier(s)), containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).				
4. This report contains indications	relating to the following its	ems:		
☑ Box No. 1 Basis of the p	noinion			
☐ Box No. II Priority				
☐ Box No. III Non-establish	ment of opinion with regai	rd to novelty, inventive	step and industrial appli	cability
☐ Box No. IV Lack of unity of	of invention			
⊠ Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement				
)	☐ Box No. VI Certain documents cited			
\$	Box No. VII Certain detects in the international application			
Sox No. VIII Certain observations on the international application				
Date of submission of the demand		Date of completion of the	ils report

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/GB2004/002740

	Box No. I	Basis of the report
1.	With regard filed, unless	to the language, this report is based on the international application in the language in which it was otherwise indicated under this item.
	☐ This rep	port is based on translations from the original language into the following language , sthe language of a translation furnished for the purposes of:
	☐ inter	mational search (under Rules 12.3 and 23.1(b)) lication of the international application (under Rule 12.4) mational preliminary examination (under Rules 55.2 and/or 55.3)
2.	have been f	to the elements* of the international application, this report is based on (replacement sheets which furnished to the receiving Office in response to an invitation under Article 14 are referred to in this priginally filed" and are not annexed to this report):
	Description,	Pages
	1-7	as originally filed
	Claims, Num	nbers
	1-7	filed with telefax on 18.04.2005
	Drawings, S	iheats
	1/3-3/3	as originally filed
	☐ a sequ	ence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing
3.	⊠ The am	neridments have resulted in the cancellation of:
		description, pages claims, Nos. 8-10
	☐ the	drawings, sheets/figs sequence listing (specify):
	☐ any	rtable(s) related to sequence listing (specify):
4.	had not bee	eport has been established as if (some of) the amendments annexed to this report and listed below en made, since they have been considered to go beyond the disclosure as filed, as indicated in the ital Box (Rule 70.2(c)).
		description, pages claims, Nos.
	□ the	drawings, sheets/ligs sequence listing (specify):
	□ any	y table(s) related to sequence listing (specify):
	* If it	em 4 applies, some or all of these sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/GB2004/002740

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial Box No. V applicability; citations and explanations supporting such statement

1. Statement

Claims No:

2. Citations and explanations (Rule 70.7):

see separate sheet

Certain defects in the international application Box No. VIII

The following defects in the form or contents of the international application have been noted:

see separate sheet

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

PCT/GB2004/002740

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 1 Reference is made to the following documents:
 - D1: US-A-4 051 565 (BERGE TRYGVE) 4 October 1977 (1977-10-04)
 - D2: EP-A-0 966 892 (SIEWERT RONALD R) 29 December 1999 (1999-12-29)
 - D3: US-A-3 648 291 (PANKERS ALVA L) 14 March 1972 (1972-03-14)
- 2 The present application does not meet the criteria of Article 33(1) PCT.
- 2.1 In the description (page 2, lines 24 29) a material fulfilling de conditions of friction disclosed in claim 1 is described as a known and commercialized product. Therefore, a sheet of this known material would have all the technical features of claim 1 rendering it not novel.
- 2.2 Document D1 discloses a medical protection sheeting formed from Teflon (in sheet or woven or coted fabric form) (column 3, lines 36 - 47, figure 1) and having therefore a coefficient of static friction (teflon-teflon) substantially the same as its coefficient of dynamic friction. This value is lower than 0.4.

Document D2 (§48, §49) also discloses a medical protection sheeting formed from two woven materials with a coefficient of friction between both lower than 0,3.

Therefore the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

2.3 Dependent claims 2 to 7 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty or inventive step, the reasons being as follows:

Inventive step:

D3, the whole document; for claims 6 and 7

In claims 2 to 5 slight constructional changes in the medical protection sheeting of claim 1 is defined which comes within the scope of the customary practice followed by persons skilled in the art, especially as the advantages thus achieved can readily be foreseen. Consequently, the subject-matter of claims 2 to 5 also lacks an inventive step.

Re Item VII

Certain defects in the international application

3 Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the document D1 is not mentioned in the description, nor is this document identified therein.

Re Item VIII

Certain observations on the international application

- 4 Claim 1 is not supported by the description as required by Article 6 PCT, as its scope is broader than justified by the description and drawings. See page 1, lines 1 - 34 and figure 5.
- Claim 1 does not meet the requirements of Article 6 PCT in that the matter for which protection is sought is not clearly defined. The claim attempts to define the subject-matter in terms of the result to be achieved (coefficient of static friction less than 0.4 and coefficient of static friction substantially the same as its coefficient of dynamic friction), which merely amounts to a statement of the underlying problem, without providing the technical features necessary for achieving this result.
- The application does not meet the requirements of Article 6 PCT, because claim 1 is not clear. Coefficient of friction depends on two surfaces and therefore it is not clear in claim 1 in relation to which other surface is given the coefficient of friction.

8

CLAIMS

- 1. A medical protection sheeting formed from woven material characterised in that the material has a coefficient of static friction less than 0.4 and that the coefficient of static friction is substantially the same as its coefficient of dynamic friction.
- 2. A protection sheeting as claimed in any of the preceding claims wherein the linear density of the material is between 1000 and 40 decitex.
 - 3. A protection sheeting as claimed in claim 4 wherein the linear density is 470, 350 or 50 decitex.
 - 4. A protection sheeting as claimed in claim 4 or 5 wherein the weight of the material is between 200 and 50 gm/m^2 .
- 20 5. A protection sheeting as claimed in claim 4 wherein the material's weight is $180~\rm{gm/m^2}$ for the 350 decitex material and about 62 gm/m² for the 50 decitex material.
- 6. A protection sheeting as claimed in any one of claims 1 to 7, formed as a bootee (30) with one or more layers of the material.
 - 7. A protection sheeting as claimed in claim 8 wherein the bootee (30) is formed without a toe.
